(54) Title: FREEZING FURNITURE AND AN INSERT THEREFOR

(57) Abstract: In a first aspect, the invention relates to a piece of freezing furniture comprising a storage space (3), intended for products to be frozen, and a primary air duct (4), which partly surrounds said storage space (3) and which comprises a suction duct (11), having an inlet (12) that mouths at one side of the opening (13) of the storage space (3), as well as a rising duct (14), having an outlet (15) that mouths at the opposite side of said opening (13), and a temperature-change unit (36), which is located in the primary air duct (4) and separates the suction duct (11) from the rising duct (14) and includes a fan (16), a heating element (17) and a cooling element (18), wherein, in normal operation, cooled air flows from the temperature-change unit (36) via the rising duct (14), over and past said opening (13), through the suction duct (11) and back to the temperature-change unit (36). In a second aspect, the invention also relates to an insert for such a piece of freezing furniture.
